

# HV359T

## Mobile Video HDD Pro

### Introduction

The new HV359T supports 1080i high definition video output for best picture quality and standard 3.5" SATA HDD for the ever-increasing storage demand for digital contents.

The HV359T, when connected to a PC, is just like a USB 2.0 external hard drive. User can manage the contents easily with a PC. The internal hard drive can be formatted to NTFS. Folders can be created to store home video, music, or photos on the internal HDD with a PC, and then immediately playback the contents on TV. It also supports media files playback from a USB drive attached to it.

The HV359T features more like full DVD menu support, network/Wireless accessing, AV recording and playlist support, all make it the best choice for building the consumer's digital home theater system.
